Photo: Reuters Hong Kong leader CY Leung has delivered his resignation, days after it was announced he was charged with the unlawful sexual contact of an undercover reporter. Mr Leung said he would not serve out the rest of his term and would step down on August 30 to pave the way for the installation of a provisional council to run the semi-autonomous Chinese city for the next six months. He stepped down on Monday. The announcement came as Hong Kong marked the 20th anniversary of the city's return to Chinese rule from the United Kingdom. An estimated two million people marched through the streets in protest against the 2014 protests that were sparked by a proposal to allow extraditions to mainland China, which protesters fear would be used to prosecute those who have expressed pro-democracy views. But the 2019 protest was peaceful and orderly. Hong Kong, which returned to Chinese rule in 1997 under a "one country, two systems" formula, is regarded as a global financial hub and major trade gateway. How to use the code The contours for the plastic sheet are placed at the path in the model, which can be found from the "Settings" window. If you are using the default installation, the settings are located in the folder "Software\Autodesk\Academy\AutoCAD" How to cut the contours by paper cutter or guillotine To cut the plastic sheet, it is better to use a guillotine or paper cutter. Connect a paper cutter or a guillotine to the selected path in the model. The tool automatically cuts all the contours in the model. Change the side of the guillotine.
