* **Paint:** Paint is the first main tool in Photoshop. It's where you create new images from scratch. You can use layers to save your work, and you can use transparency. You can also use your image to paint over another layer to produce a number of amusing results. * **Pencil:** The Pencil tool is similar to Paint in that it's a raster tool that creates a new image and allows you to build up layers. You can create, erase, and alter the layers as you see fit. This tool is designed for quick, spur-of-the-moment edits. * **Lasso:** The Lasso tool lets you make precise selections in any image. It's great for isolating parts of a photo and then you can crop, paint, or apply other effects to the part. You can't use Lasso to quickly do a complete-image edit, but for large portions of a photo, it's easier than using Paint. Lasso is used for more precise and accurate selections in images. * **Eyedropper:** You can use the Eyedropper tool to sample colors from any spot within your image. * **Brush:** The Brush tool enables you to apply brushes to your image and create textures that simulate real-world surfaces and textures. You can adjust the size of the brush and then apply textures and effects to the Brush tool. * **Tracing Paper:** You can use the Tracing Paper tool to trace over any image or text. You can then translate the trace into a new layer and change the shading, shapes, and color and tone of the traced elements. # Adding a Watermark Many software packages offer watermarking tools. Photoshop offers a watermarking tool that comes with the program but also provides additional watermarking options. In fact, Photoshop's watermark is much more sophisticated than the standard software watermark that offers most photo-editing software. You can add watermarks of just about anything you want — music, logos, or even text. You can add the watermark as a background, as a foreground, or as a graphic design element. Because of the watermark's sophistication, it's particularly effective when used with other Photoshop features. Figure 10-4 shows a watermark that has been placed over a photo. If you want to add a watermark to one of

To this day, Duke was one of the most exciting and mysterious clubs in the nation. Everyone knew what they were. They were not. Not only was Duke a powerhouse in sports (men's basketball and football), its basketball team played in the national championship game in 1980 and reached the Final Four in 1987 and 2003. But the truth is Duke was many things. It was not, however, a varsity school. The club was still a part of the academic curriculum, but for many students it was a perfunctory subject. A student named Phyllis Jones was a member of the club and the only indication that she was a part of the university was her Duke ID card. She had earned a law degree and worked as an assistant attorney general. That changed one day in January of 1983 when a young Duke football player named Dave Waddell walked into her law office. Waddell had had an athletic career at Duke, but he said he wasn't a very good football player. "We were having a discussion and he said, 'What are you doing here,'" Jones recalled. "I said, 'I'm a lawyer and I'm here to talk to you about football.' He said, 'I don't know a thing about football.'" Jones recalled that she asked the player to take out his ID card and show it to her. It was the "coolest thing." "He had a Duke ID card," she said. "That's when I said, 'We're a school!'" Sure enough, he was. When he asked who the school's president was, Jones said he asked her. "I said, 'You're the president.'" The two began talking and Waddell told Jones that he had been recruited by several big-name schools, including North Carolina, Kentucky and UCLA. He was planning on applying for the UCLA athletic department and the only reason he wanted to go was because he had his name on it. That was unacceptable to Jones, who hired a lawyer to represent him. She said the Duke athletic department was told to transfer him to another school, but instead they stuck him in a basement and called him a "
