The product also provides native support for working with drawing and part (or geometry) libraries that are installed on users' computers, to enable collaborative creation of complex drawings on a network of desktop computers. AutoCAD also provides support for Inventor, a product from Autodesk subsidiary Autodesk Inventor. The user of AutoCAD can work with 2D and 3D drawings using its native 2D drafting tools, which include line, arc, polyline, 3D, 2D, 2D solids, and 2D and 3D freehand tools. The program supports a variety of file formats, including DGN and DWG (2D), DXF (2D and 3D), DWF (2D and 3D), DFX (2D and 3D), and PLT (2D and 3D). AutoCAD's feature set continues to be enhanced over time, and it has become the de facto standard within the AEC (architectural, engineering, construction) and civil engineering design industry. Other CAD software vendors have attempted to compete with AutoCAD's legacy, including: Architectural Desktop from Bentley CATIA from Dassault Systèmes Eon by SRS Fusion by Siemens PLM MEPsoft by Dassault Systèmes Pro/ENGINEER from PTC (now owned by Parametric Technology Corporation) SolidWorks from Dassault Systèmes and other applications. AutoCAD has been cited in more than 1,300 peer-reviewed publications as of 2011, and according to a survey conducted by Applied Research Associates in 2008, its users produced some 50,000 of the reference books published that year. Between 2002 and 2011, it was named one of the top 50 software products of all time by the Computer Software Industry Association. A number of AutoCAD specialty software and add-ons are also available, such as: AutoCAD LT, which includes the 2D drafting tools used in AutoCAD but is also intended for non-

architectural users, and is available for small business, consumer, and home users. AutoCAD LT is limited to 1024 user/permissions. AutoCAD LT for Windows (Windows only), which includes the 2D drafting tools used in AutoCAD LT and is limited to 8 user/permissions.

What do you wish you knew earlier? ====== gambiting That someone (me) would be honest with me when I asked for help and do not give me a condescending 'But I'm so clever, I know everything and you don't' reply. ~~~ reitanqild I've had some very good friends. But then they usually die or move away. I do wish I had picked up more Spanish though. I have forgotten a bunch of very useful phrases and I can usually do the basics. ~~~ gambiting My girlfriend of 3 years left me for not being able to speak anything but English and leaving all the cooking and cleaning to me. So I guess there are some shortcuts, but I wish someone would have explained them to me. Now that I'm just a single guy with no one else to turn to, I have to figure it all out on my own and it's quite difficult. ~~~ reitanqild I do wish I would have known how important my mental health was and what help I could get when I thought I was losing it. This is a bit of a tangent, but I think it relates to something you said above: > now that I'm just a single guy with no one else to turn to, I have to figure > it all out on my own and it's quite difficult. I have been at the same place and would not wish anyone there to experience that. ~~~ gambiting Yeah, that's true - I have had some really difficult times. Sometimes it's just the very nature of the situation that has been stressing me out and I can go from feeling completely fine to being an absolute wreck in just a few minutes. I had a really bad bout of depression during my second year of Uni a1d647c40b
