MP3 MUSIC FINDER Copyright 2006. MP3 MUSIC FINDER is a free program that allows you to search amazon.com and amazon.co.uk for album cover art. It's main purpose is to search the amazon.com store for covers for albums that you have no idea what the name of, but you're sure that you like. The amazon web services have a "Web Services Developer's Guide" that is now free. There's a how to walk through that document and how to connect to it at Amazon.com. Go to You can either search for "MP3 Music Finder" in the search box, or go to the MP3 Music Finder downloads page and click on the file called "Getting Started With Web Services". The web services are the same as the web site itself, but you are supposed to be able to generate and save objects through the web services instead of going through the web site. It's just easier and more efficient. The end result is the same, so the application really doesn't care what you do. The program was coded in VB6 using the Visual Studio.NET tool set. If you have any trouble or need help setting up the application, please contact me at qtech@qtech.com. This program is supported by the W3MP research group at Vrije Universiteit Amsterdam, the Netherlands.
