What's new:

- **Career Mode - Live out your dreams as both a manager and a player in FIFA 22. Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory. Or test your skills as a player, with a more immersive Player Career mode that gives you more ways to progress, achieve, and immerse yourself in your Pro's journey through the game.**
- **New innovations in gameplay. As every FIFA title, the most innovative aspects of gameplay are built in the game from the start. In FUT, we continue this mentality as well. We take a closer look at some of the most iconic moments in football history and bring them to life with innovations in gameplay. We have also built new mini-game mechanics that do not resemble FIFA in any way.**
- **Manager - New to Ultimate Team. Whether you want to become an expert manager by building a club from scratch and competing on all fronts, or whether you just want to take part in online competitions against real managers, you can try it out for yourself. At the moment, there are only eight real manager**

opponents available in FIFA 22. We have been working to make this feature much more appealing for the user base.

System Requirements:

This is a work in progress mod that's pretty much in its early stages. All of the items in this mod are fully remade, and new textures and so on have not been applied. This mod makes use of the 4.7 framework, so if your computer can't handle it, you might wanna wait until 4.7.0 is released. That being said, I expect 4.7 will most likely be released in about 1 month, so I'm saying that you should expect it by late June if everything goes well. As long as I don't have all the items
