ScreenParts Crack+

To capture a part of your desktop, Launch the program and click the Capture Desktop button. Specify the area of the screen you want to capture. Click the Save button. This screen capture utility has additional screenshot options too: Capture the current active window. Capture the current active desktop. Capture the active screen. Capture the active printer. Capture the active mouse. All of the above. The application has this settings dialog so you can specify what you want the screenshots to include: Window Elements - which windows are to be captured (added to the screenshots) Desktop Elements - what's on the screen (desktop elements like browsers, desktop gadgets, desktop icons,...) Detail Elements - which object is not captured (mouse, icons,...) If you already have an image file of the desktop, you can load this image file and use this tool to load and save it, e.g.: Open the image file, e.g. using Photo View. Open the capture tool. Click the Capture Desktop button. Click the Load file button. In the File to load window, select the image file. Click the Open button. Click the Save button. If you're interested in more information about ScreenParts, please see the [Features and Screenshots page][ScreenParts is a freeware, [30-day trial][(evaluation version)(If you like ScreenParts, you can also get ScreenParts Plus. See the [ScreenParts Plus page](for more details. This version of ScreenParts is available in Russian, French, German, Portuguese, Spanish, Japanese. Chinese and Hungarian. The [latest version of this ScreenParts edition](is available in English. ![Screenshots of ScreenParts](

What's New In?

----- ScreenParts allows you to easily capture up to 4 screen captures in one, saving them to the Windows clipboard. It also allows you to select certain parts of the screen or all of the screen to be captured. ScreenParts allows you to effortlessly select parts of your screen or entire screen on your computer and save them to the Windows clipboard. It also allows you to perform various other simple tasks like drawing a selection area on top of an image file, or save screenshots to clipboard, send them directly through email, attach them to Word, PowerPoint or any other file, save them to a Zip or Zip+ file for easy storage / portability, batch save to multi-screen images with filename including date, and much more. ScreenParts Features: ----- * Allows you to select up to four captures in a single screen capture screen. * For easy pasting, ScreenParts saves screen captures directly to the Windows clipboard. * Batch capture the whole screen or individual parts of your screen: drag the Mouse to draw a selection area over any part of the screen, or press CTRL+C to capture the whole screen, or use mouse to move the mouse pointer over any corner of the screen to capture the entire screen. * Image thumbnails are automatically created in your Windows desktop and are named based on the capture's timestamp. To view a specific thumbnail, double click the thumbnail, or use the context menu to select "Show image" to view the screen capture image on your desktop. * In the "Screen Properties" tab, you can specify the aspect ratio, quality, and resolution for a capture. For example, capture the whole screen with a 320x480 pixels screen quality (minimum resolution) and have your desktop display the captured image with a aspect ratio of "16:9" to fill the screen. * In the "Preview" tab, you can preview your captures before saving them. For example, you can quickly preview a screen capture without saving it. After previewing, click the "Save to clipboard" button to save it. You can also delete a capture from the list by clicking the delete button. * In the "About" tab, you can get help, view system requirements, and access the download link. * Works with Windows XP/Vista/7/8/10. ScreenParts is a simple, easy to use screenshot capture program designed to enable you to capture areas of your screen, to the clipboard and /
