know how to get the JSON data from the URL like this: `$.getJSON("", function(data) {` I just don't know how to put it into a POST so that I can post it to the URL. And how would I format the JSON? I have never created any JSON.

Thanks! A: Method is same as `$.post` method `$.post("", {"json": data},`

```
function(data){ //you can  
  access this data here }
```

Singing for our own amusement can be a joy and in some cases a serious business.

Nothing is more pleasing than seeing a few belting notes on a clear, cold winter morning. A couple of years ago my wife came home from a singing lesson and told

me that she had sang in the final audition for the Miss America Pageant. It was not her first time being in a contest (she had already won the Miss Maryland beauty contest) but as a singer and performer she felt her talent had a limit. She had just finished singing the song "I want to thank you for being

my friend" when she heard the producer screaming for her to stop
